## DETAILED ACTION

### *Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a composition comprising a cooling agent with an ester derivative, classified in class 514, subclass 506.
- II. Claims 10-12, drawn to an article containing the composition of claim 1, classified in class 424, subclass 430, 431, 443, 445 and 447, for example.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because it is drawn to an article containing the composition of claim 1 which broadly recites a composition comprising a cooling agent and does not recite a composition wherein the cooling agent is menthol and/or peppermint oil in combination with (b) a second cooling agent selected from the group consisting of ketals, carboxamides, cyclohexyl derivatives with the exception of menthol, cyclohexanol derivatives and mixtures thereof. The subcombination has separate utility such as after-shave preparation.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different

classification and would present an undue burden of search on the Examiner, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is requested to elect a specifically and fully disclosed composition for purposes of examination. Such an election should include a fully described ester derivative and cooling agent(s). If Applicant elects Group II invention, then it is requested that applicant elect an article (claim 11) as well as a specifically and fully disclosed composition for purposes of examination.

A telephone call was made to Roddy Bullock on 06/14/2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
